

Samsung CL80

Thursday, 13 May 2010

Well if you are searching for a miniature digital camera, that comes packed with at least 14 megapixel sensor, I'm pretty sure that the Samsung CL80 fits your description as a power-packed pocket camera. Generally, this particular camera also comes with a WiFi enabled point-and-shoot functionality, whereby I'm sure that the camera fits the description as a very ideal digital camera.

Personally, I like the WiFi functionality, whereby you can use this particular connectivity to connect to the Boingo network. Basically, Boingo is offering 3 free months of usage for their services, whereby when you are utterly satisfied by their wireless connectivity, you can continue your subscription for \$8 per month.

Would you like to be a proud owner of the Samsung CL80?
