

## Fujitsu Arrows V F-04E

Monday, 25 February 2013

Do you know that Fujitsu also has their very own smartphone? In fact, Fujitsu has earlier collaborated with NTT DoCoMo in developing a smartphone called the Fujitsu Arrows V F-04E, and this particular smartphone was featured at the MWC 2013, which drew tremendous enthusiasm from the crowd. Well, it looks like the Fujitsu Arrows V F-04E would be turning into reality, as the company would be pushing the smartphone out pretty soon.

Generally, the Fujitsu Arrows V F-04E is powered by a 1.5GHz quad-core CPU. It also has a 4.7-inch 720p display and one of the highest density camera with 13.1 mega-pixel. The smartphone is also equipped with 64GB of storage, and it comes with an integrated 1seg TV antenna too. Well, if you like Fujitsu products, then perhaps you should take a closer look at the Fujitsu Arrows V F-04E.
