

White Nexus 4 Now Available on Play Store and T-Mobile

Saturday, 01 June 2013

The Nexus smartphone series is definitely one of the favorite choices of smartphones in recent years, as clearly, Google's brand name is marked on the device, which creates the attractiveness for the device. However, the color choices for these devices are somewhat limited – but that is about to change, as the white Nexus 4 will be hitting the US Google Play Store and T-Mobile pretty soon!

Generally, you can purchase the white Nexus 4 for just \$299 via Play Store. But if you find the pricing still a little high end for your budget, then perhaps you should take a closer look at T-Mobile's option, which promises to lower the price of the smartphone, provided if you take up their minimum 2-year plan that is. Fancy a white Nexus 4 anyone?
