

LG GX

Monday, 16 December 2013

LG is making waves in the smartphone market, as clearly, they are one of the leading smartphone manufacturers in the world. And if you have been anxiously waiting for LG's latest technological wonder, you should definitely take a closer look at the latest LG GX smartphone. Generally, the LG GX is a 5.5-inch full HD IPS display smartphone, and it packs the brand-spanking-new quad-core Snapdragon 600 CPU.

The LG GX also comes with the nifty 13-megapixel camera, and there's a whole lot of onboard storage available too – with 32GB at your disposal. And powering the device is a large 3,140 mAh battery, which is set to give you enough juice to moderate to heavy usage for a day. Of course, if you are shopping for the perfect-large smartphone as your Christmas present this year, take a closer look at the LG GX, which I believe would definitely suit your taste.
