

Battleships - General Quarters

Monday, 25 December 2006

Captain!! German U-Boats sighted near the coast line! Enemy aircraft carrier closing! Everybody into battle station! Code RED! I repeat Code RED! This is a classic game of battleship. I remember playing this on a piece of paper torpedoing my friends on his sheet of paper. Place your ships in the given slots. Press the left or right cursor to adjust the ship position accordingly. Just click on any empty space in your enemy's sheet to start shooting.
