## Gold Watches: The Bling-Bling for Men

Wednesday, 23 July 2008

I've been working hard to make money online and I believe that it's time to spend some of my online fortune. Being an entrepreneur in the business world (yes I have another business running in the "real world" simultaneously with my "virtual business"), it's pretty hard to choose between gold watches, a Mont Blanc pen or an expensive suit as my reward.

Something caught my attention while browsing online and these are pocket watches! These classic pieces are so elegant that it makes an ideal business gift as well. Some of the watch designs are even plated with 14K gold. Gold pocket watches anyone?
